SUMMARY

Full-Stack Developer with **3+ years** of production experience, front-end leaning: React / Next.js applications across blockchain, real-estate, and B2B SaaS domains. Strong in component architecture, state management (TanStack Query / Redux Toolkit), real-time UIs (Socket.io), and front-end performance, with **Node.js / Express / MongoDB** for end-to-end delivery. Niche experience in **Web3** (wallet-signature auth), **technical SEO**, and **AI engineering** (OpenAI / Gemini APIs, streaming LLM UIs).

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES2024+), HTML5, CSS3

React / Next.js: React 18/19, Next.js App Router (Server Components, Server Actions, Suspense streaming), TanStack Query, Redux Toolkit / RTK Query, Zustand, React Hook Form, Framer Motion

AI Engineering: OpenAI & Gemini API integration, streaming LLM UIs (SSE / token streaming), Vercel AI SDK, TTS pipelines; AI-assisted workflow (Claude Code, OpenAI Codex)

UI & Styling: Tailwind CSS, shadcn/ui (Radix), Material-UI, Ant Design, Responsive / BEM

Backend: Node.js, Express.js, RESTful APIs, MongoDB, PostgreSQL + Prisma, JWT & wallet-signature auth, Socket.io (real-time)

DevOps & Cloud: Git, GitHub Actions (CI/CD), Docker, AWS (EC2, S3), Vercel, Firebase

Testing: Jest / Vitest, React Testing Library

Specialized: Web3.js & Ethers.js, Technical SEO (Google Search Console, SEMRush), Vue 2 (production experience)

Ways of working: Agile / Scrum, code review, technical documentation in English

INDUSTRY EXPERIENCE

Freelance Full-Stack Developer & Founder

Self-employed

Jan. 2025 – Present

Ho Chi Minh City, VN

- **AI Content Automation** — Designed and built an end-to-end AI content-production pipeline (*Node.js, TypeScript*): LLM scripting via OpenAI & Gemini APIs, TTS voice-over generation, scheduled batch runs, and multi-provider fallback on rate-limit / error
 - * Operate it as a revenue-generating product: 3 YouTube properties, **1.8M+ subscribers**, **3,000+ videos** at ~100/week peak, **\$20K+ revenue**
 - * Own the full lifecycle solo — architecture, prompt engineering, token-cost monitoring, incident handling, iteration driven by retention / CTR analytics
- **Entertainment Blog** — Built and operated a production blog platform (*Next.js 14, Node.js, MongoDB, Material-UI*) serving **10k+ monthly visitors**; end-to-end SEO ranked **10 keywords** on Google page 1 within 3–4 months, improving organic traffic ~30%
- **AI-native engineering workflow** — Claude Code and OpenAI Codex daily for scaffolding, refactoring, debugging and documentation; prompt engineering and cross-model evaluation (OpenAI vs Gemini) applied in production

Playground Ltd.

Full-Stack Developer

Sep. 2023 – Sep. 2024

Ho Chi Minh City, VN

- **Blockchain P2P Exchange** — Open-source peer-to-peer cryptocurrency exchange platform (Team: 8) | *Next.js, Node.js, MongoDB, Web3.js, Ethers.js*
 - * Architected and shipped a full-stack marketing & blog platform (Next.js + Node.js + MongoDB), enabling the content team to publish **200+ articles** supporting user onboarding and go-to-market
 - * Integrated Web3.js and Ethers.js for real-time on-chain data queries (wallet balances, transaction history), reducing reliance on third-party APIs

- * Implemented decentralized authentication combining JWT and wallet-signature verification, passing internal security audit
- * Researched and optimized open-source P2P exchange code; proposed and executed migration to the Next.js App Router, improving build performance and DX across the team

Sanbul Solutions

Apr. 2023 – Sep. 2023

Front-End Developer

Ho Chi Minh City, VN

- **Casual Game Suite** — Flip Coin, Hilo, Sprint Wheels real-time multiplayer games (Team: 5) | *React, TypeScript, Redux Toolkit, RTK Query, Material-UI, Socket.io, Framer Motion*
 - * Independently built 3 real-time game interfaces (Flip Coin, Hilo, Sprint Wheels) with Socket.io-powered multiplayer, supporting concurrent gameplay sessions
 - * Designed the animation system using Framer Motion, optimized for smooth playback on mid-tier mobile devices
 - * Implemented outcome-calculation logic and edge-case handling (disconnects, race conditions, replay) to stabilize gameplay sessions across unreliable mobile networks

PapaGroup

Dec. 2021 – Apr. 2023

Front-End Developer

Ho Chi Minh City, VN

- **WHIZZ** — Enterprise property-valuation management platform (Team: 15) | *React, TypeScript, Redux Toolkit, RTK Query, React Hook Form, Material-UI*
 - * Owned UI and business logic for **7 core modules**: Auth, Dashboard, Employee Accounts, Customer Accounts, Contracts, Catalog Management, Financial Management
 - * Ensured **100% responsive** layouts across mobile/tablet/desktop and full cross-browser compatibility
- **TABTAB-ASIAN** — Real-estate exchange platform (Team: 8) | *Next.js, TypeScript, Ant Design*
 - * Built the base application layout and UI foundation for the real-estate exchange platform
 - * Integrated RESTful APIs and implemented core logic for Home and Search pages, including debounced search and faceted filters
- **Other projects: VSTAR-SCHOOL** (Vue 2, Vuex, Vuetify) — school-management system; maintained time-log, scheduling, and learning-statistics modules, led front-end bug triage. **P-INVOICE** (React, Material-UI, CKEditor 5) — engineered a WYSIWYG custom invoice-template builder with REST API integration

PROJECTS

4K Movie — personal full-stack movie-streaming web app | *Vite, React, TypeScript, Redux Toolkit, RTK Query, Material-UI 5, Firebase, TMDB API*: multi-provider auth (Firebase/Google/Facebook/GitHub), i18n, dark-light & RTL theming, lazy-loading, nested comments, and debounced search. **Demo** | **GitHub**

EDUCATION

Binh Duong Economics and Technology University (BETU)

Jul. 2017 – Dec. 2021

Bachelor of Information Technology

Binh Duong City, VN

LANGUAGES

Vietnamese: Native

English: Professional working proficiency — technical documentation, code review, and written remote collaboration
